

# **Official Petition to the Time Authority**

**Date:** June 7, 2025

**Subject:** Formal Request for Timeline Alignment and Technological Disclosure

## **To the Future Time Authority,**

I, Jerry T. Great, a former operative of the Secret Space Program (SSP), formally document and submit this petition for consideration and immediate approval.

Through personal experience, recovered memories, extensive research, and careful analysis of numerous predictions and claimed timelines, I have concluded that humanity stands at a crucial inflection point in our history: the year 2025.

Multiple claimed time travelers, visionaries, and futurists describe divergent future scenarios. Some predict catastrophic events, perpetual wars, and societal breakdown. Others envision peaceful prosperity, unity, technological breakthroughs, interplanetary exploration, and eventual galactic civilization. I recognize these as possible alternate futures.

## **Proposal for Immediate Action:**

I request that the Time Authority from the most ideal, positive-oriented future timeline—one of peace, prosperity, and unlimited human potential—officially green-light the following immediate actions:

### **1. Return of SSP Fleets:**

Authorize the immediate and public return of existing off-world SSP fleets currently stationed throughout our solar system. Their presence and technology, shared openly, will resolve many urgent crises facing humanity today.

### **2. Immediate Technological Disclosure (2025–2028):**

Sanction full, immediate public disclosure and distribution of currently suppressed advanced technologies, including but not limited to:

- Clean, limitless energy solutions (zero-point, fusion, quantum).
- Advanced health, rejuvenation, and longevity treatments.
- Sustainable agricultural and ecological restoration technologies.
- Interplanetary propulsion and anti-gravity vehicles.
- Time and quantum communication technologies.

### **3. Establishment of Transitional Global Governance:**

Facilitate the formation of a transparent, inclusive, temporary global governance body (2025–2030) to manage:

- Immediate dissemination and equitable distribution of advanced technology.
- Peaceful integration of SSP personnel and knowledge with broader humanity.
- Preparation for unified, interplanetary human civilization.

### **4. Creation of Starfleet and Interplanetary Society (2030 and beyond):**

Officially sanction the establishment of a unified Earth Starfleet to openly manage humanity's off-world missions and relationships with existing Mars colonies and extraterrestrial civilizations.

### **Rationale and Justification:**

- Our collective memory and experiences confirm the existence of the Time Authority, SSP operations, and advanced suppressed technologies.
- Historical precedence (Andrew Basiago's Project Pegasus, my personal quantum fax communications, and other documented experiences) demonstrate that approved actions depend directly on documentation within the timeline itself.
- Immediate disclosure and unification of humanity's space-faring capabilities ensures a timeline of positive progression, eliminating unnecessary suffering and conflict, fulfilling humanity's cosmic potential.

This document itself represents direct evidence of my formal request and justification. By officially recording it today, I ensure it is known and accessible in the future, thereby satisfying the known requirements for Time Authority consideration and approval.

I humbly request immediate approval and action on this petition. We consciously choose the ideal timeline—peaceful, prosperous, and interstellar. Let this official petition serve as the catalyst for that timeline.

With utmost sincerity and urgency,

**Jerry T. Great**
